ПОВТОРЯЕМ ИЗУЧЕННОЕ:
СЛОЖЕНИЕ И ВЫЧИТАНИЕ В ПРЕДЕЛАХ 20
ВИДА $15 + 4$, $15 - 3$

(без перехода через разряд)

$15 + 4$ Число **15** раскладываю на сумму разрядных слагаемых **10** и **5**. Единицы складываю с единицами: **$5 + 4 = 9$** . Потом к **10** прибавляю **9**, получаю **19**. Значит, **$15 + 4 = 19$** .

$15 - 3$ Число **15** раскладываю на сумму разрядных слагаемых **10** и **5**. Единицы вычитаю из единиц: **$5 - 3 = 2$** . Потом к **10** прибавляю **2**. Значит, **$15 - 3 = 12$** .

Реши примеры.

☺ — 1,5 мин ☹ — 2,5 мин ☠ — 4 мин Лучшее время

ПОВТОРЯЕМ ИЗУЧЕННОЕ:

СЛОЖЕНИЕ И ВЫЧИТАНИЕ В ПРЕДЕЛАХ 20
ВИДА $7 + 6$, $13 - 5$ (с переходом через разряд)

$7 + 6$ Удобнее прибавлять к круглому числу (к **10**). Число **6** раскладываю на сумму удобных слагаемых так, чтобы **7** дополнить до **10**. Потом прибавляю остальное. $7 + 6 = 7 + (3 + 3) = (7 + 3) + 3 = 10 + 3 = 13$. Значит, $7 + 6 = 13$.

$13 - 5$ Удобнее вычитать из круглого числа (из **10**). Число **5** раскладываю на сумму удобных слагаемых так, чтобы **13** уменьшить до **10**. Потом вычитаю остальное. $13 - 5 = 13 - (3 + 2) = (13 - 3) - 2 = 10 - 2 = 8$. Значит, $13 - 5 = 8$.

Реши примеры.
