Королёв, Владимир Иванович.

К68 Математика. Тренировочные примеры. 2 класс /
В. И. Королёв. — Москва : Эксмо, 2025. — 128 с. —
(30 000 заданий для закрепления знаний).

ISBN 978-5-04-216138-4

Главная задача тренажёра — развитие у второклассника умения считать быстро и без ошибок. Для доведения навыков счёта до автоматизма и надёжного их закрепления ему предлагается решать примеры на скорость. Степень усвоения материала оценивается по времени, затрачиваемому на решение, и количеству допущенных ошибок. Все задания сгруппированы в стандартные блоки. В каждом из них ученику нужно выполнить короткую, среднюю и длинную серию примеров, выстроенных в столбики различной длины. Они носят названия «Спринт», «Средняя дистанция» и «Марафон». Перед началом решения каждого столбика нужно засечь время, а по окончании — записать минуты и секунды. После этого проверяются ответы. Если были допущены ошибки, их количество также записывается. Постепенно по мере уменьшения затраченного времени количество ошибок будет стремиться к нулю. Пособие предназначено для занятий как дома, так и в школе в качестве дополнительного материала.

ШКОЛЬНИКАМ И ВЗРОСЛЫМ

О ТРЕНАЖЁРЕ

Если человек хочет добиться успехов в спорте, он усиленно тренируется. Точно так же обстоят дела и с математикой. В спорте сильный и целеустремлённый атлет награждается медалью, ценным призом и чемпионским титулом. А что же получает в награду человек, в совершенстве овладевший всеми приёмами математики? Во-первых, ему не страшны самые сложные задачи, и в уме он сосчитает быстрее, чем если бы нажимал на кнопки калькулятора. А во-вторых, ему торжественно вручается Диплом знатока математики.

КАК С НИМ РАБОТАТЬ

Тренажёр содержит задания, предусмотренные курсом математики для учащихся 2 класса. Это примеры на сложение и вычитание в пределах 100, а также на умножение и деление на 2. Для того чтобы школьник мог довести навыки счёта до автоматизма и надёжно закрепить их, ему предлагается решать примеры на скорость. Степень усвоения материала оценивается по двум критериям: времени, затрачиваемому на решение, и количеству ошибок.

Все задания сгруппированы в стандартные блоки. В каждом из них ученику нужно выполнить короткую, среднюю и длинную серию примеров, выстроенных в столбики различной длины. Они носят названия «Спринт», «Средняя дистанция» и «Марафон». Перед началом решения каждого столбика нужно засечь время, а по окончании — записать, сколько прошло минут и секунд. После этого проверяются ответы. Если были допущены ошибки, их количество также записывается.

ОБРАБОТКА РЕЗУЛЬТАТОВ

Чтобы узнать, сколько времени требуется на решение одного примера, количество секунд делится на количество примеров в столбике. Если ребёнок решает пример быстрее, чем за 5 секунд, значит,

он отлично усвоил тему. Результат в интервале 5–7 секунд — это тоже неплохо. Но если на решение одного примера уходит больше 7 секунд, ученику следует поднажать на математику и быть более собранным во время выполнения заданий.

Допустим, ученик решил столбик из 13 примеров в блоке «Спринт» за 1 минуту 5 секунд. Делим секунды на количество примеров:

$$65 : 13 = 5 \text{ с}$$

Таким образом, один пример решается ровно за 5 секунд. Это хорошая скорость, но можно решать и быстрее.

Однако в погоне за скоростью не следует забывать об ошибках. Ученику нужно стремиться к тому, чтобы в графе «Ошибки» всегда красовалась цифра 0, а в графе «Время» цифра неуклонно снижалась от блока к блоку, от страницы к странице.

ЛЁГКАЯ РАЗМИНКА

Любой спортсмен хорошо знает, что такое усталость. И на тренировках, и на соревнованиях он тратит очень много энергии. Спортсмен должен уметь давать себе отдых и расслабляться для восстановления сил. Однако это не значит, что он должен просто сидеть или лежать неподвижно. Опытный спортсмен сочетает отдых с лёгкими разминочными упражнениями.

Поэтому между «Средней дистанцией» и «Марафоном» школьнику, уже несколько уставшему от решения примеров, тоже предлагается разминка — забавные головоломки, ребусы, загадочные рисунки и другие задания. Такое переключение позволит одолеть долгую марафонскую дистанцию.

НАГРАДА

В конце каждого раздела помещён бланк Диплома знатока математики. В него школьник должен вписать имя и фамилию, а также свои лучшие результаты в «Спринте», «Средней дистанции» и «Марафоне».

Итак, приготовьте секундомеры!

На старт... Внимание... Марш!
