Уважаемые взрослые! 2

МАТЕМАТИКА

Сложение и вычитание 5

Все цепочки примеров 25

Задачи на движение 45

Задачи на периметр и площадь 60

РУССКИЙ ЯЗЫК

Правописание приставок, суффиксов, окончаний 77

Тестовые задания за весь курс 3 класса 92

Уважаемые взрослые!

Перед вами уникальное пособие, которое содержит все виды заданий по математике и русскому языку для 3 класса.

В разделе «Математика» ваш ребенок повторит и закрепит все навыки счета:

- сложение и вычитание в пределах 100 и 1000;
- сложение и вычитание в пределах 1000 столбиком;
- решение математических цепочек примеров;
- решение разных видов задач на движение;
- решение задач на периметр и площадь.

Большое внимание в разделе «Задачи на движение» уделяется работе с *уникальными авторскими схемами движения*, которые позволят ребенку без труда освоить довольно сложный материал.

Одна из основных трудностей в освоении геометрических задач заключается в том, что дети путают понятия периметра и площади, а также плохо разбираются в единицах длины. Система заданий в разделе «Задачи на периметр и площадь» тщательно выстроена по мере увеличения сложности материала и содержит подробное объяснение базовых понятий и каждого вида задач.

Задачи в пособии хорошо структурированы и можно начать занятия с любого уровня сложности.

В раздел «Русский язык» включены упражнения и задания на правописание приставок, суффиксов и окончаний. Изучение состава слова является одной из важных тем в начальной школе, так как влияет на формирование грамотного письма. В разделе «Правописание приставок, суффиксов, окончаний» даны основные правила правописания, а также задания на отработку и закрепление материала.

Повторяя изученное в 3 классе, ребенок прямо в пособии сможет пройти тестовые задания по русскому языку за весь курс 3 класса.

Пособие может быть использовано дома для закрепления изученного материала, во время каникул для быстрого повторения той или иной темы учебного курса, а также — на уроках математики и русского языка в школе для проведения самостоятельных работ.

Желаем вам успехов!

МАТЕМАТИКА

СЛОЖЕНИЕ И ВЫЧИТАНИЕ

ВСЕ ЦЕПОЧКИ ПРИМЕРОВ

ЗАДАЧИ НА ДВИЖЕНИЕ

ЗАДАЧИ НА ПЕРИМЕТР И ПЛОЩАДЬ

Основные приемы счета формируются у ребенка в первые годы обучения. Именно поэтому очень важно уделить отработке этого навыка особое внимание.

В блоке «Сложение и вычитание» ребенок отработает навыки сложения и вычитания в пределах 100 и 1000, умножения и деления.

Решение математических цепочек и примеров также поможет вашему ребенку отработать и закрепить до автоматизма навыки счета, подготовит к выполнению более сложных вычислений на умножение и деление.

Выполняя цепочки примеров, ребенок должен хорошо знать последовательность действий.

Если в выражении нет скобок, то действия выполняются по порядку слева направо.

$$4 + 5 - 2$$

$$a + b - c$$

В выражениях со скобками сначала вычисляют действия в скобках, затем по порядку слева направо выполняется:

- 1) умножение или деление потом 2) сложение или вычитание.

$$c \cdot (a + b) + b : c - a$$

В блоке «Задачи на движение» ребенок отработает решение простых и составных задач на движение одного объекта.

В блоке «Задачи на периметр и площадь» ребенок без участия взрослых сможет решить:

- простые базовые задачи на прямое применение формул периметра и площади;
- более сложные составные задачи.

Определить готовность ребенка помогут тесты, содержащиеся в блоках задач.

СЛОЖЕНИЕ И ВЫЧИТАНИЕ

СЛОЖЕНИЕ И ВЫЧИТАНИЕ В ПРЕДЕЛАХ 100
