

**повторяем изученное: сложение  
и вычитание в пределах 20  
вида  $7 + 6$ ,  $13 - 5$   
(с переходом через разряд)**

**$7 + 6$**  Удобнее прибавлять к круглому числу (к **10**). Число **6** раскладываем на сумму удобных слагаемых так, чтобы **7** дополнить до **10**. Потом прибавляю остальное.  $7 + 6 = 7 + (3 + 3) = (7 + 3) + 3 = 10 + 3 = 13$ . Значит,  $7 + 6 = 13$ .

**$13 - 5$**  Удобнее вычитать из круглого числа (из **10**). Число **5** раскладываем на сумму удобных слагаемых так, чтобы **13** уменьшить до **10**. Потом вычитаю остальное.  $13 - 5 = 13 - (3 + 2) = (13 - 3) - 2 = 10 - 2 = 8$ . Значит,  $13 - 5 = 8$ .

**повторяем изученное:  
сложение и вычитание вида  
40 + 16, 40 - 16**

**40 + 16** Число **16** раскладываю на сумму разрядных слагаемых **10** и **6**. Десятки складываю с десятками: **40 + 10 = 50**. Потом к **50** прибавляю **6**. Получается число **56**. **40 + 16 = 40 + (10 + 6) = (40 + 10) + 6 = 50 + 6 = 56**. Значит, **40 + 16 = 56**.

**40 - 16** Число **16** раскладываю на сумму разрядных слагаемых **10** и **6**. Десятки вычитаю из десятков: **40 - 10 = 30**. Потом из **30** вычитаю **6**. Получается число **24**. **40 - 16 = 40 - (10 + 6) = (40 - 10) - 6 = 30 - 6 = 24**. Значит, **40 - 16 = 24**.
