## Express the following in English.

- 1) На фотографии я вижу мальчика, он занимается работой по дому, он протирает поверхности. В правой руке он держит тряпку. Возле него стоит ведро с мыльной водой.
- 2) На втором фото я вижу девочку, она моет полы. В руке у неё швабра.
- 3) Когда я был ребёнком, я предпочитал пылесосить, а не подметать полы. Основная причина в том, что пылесос легче использовать, чем метёлку. Кроме того, я ненавижу замечать пыль в совок.
- 4) Лично я предпочитаю поливать растения, а не вытирать пыль, так как у меня аллергия на пыль. Кроме того, я очень люблю цветы.
- 5) Я бы предпочла выгуливать собаку, а не разбирать посудомойку. Основная причина этого может быть в том, что я люблю гулять по утрам, когда улицы безлюдны.
- 6) Когда я был ребёнком, я отвечал за застилание постели и уборку своих игрушек. Сейчас мои родители заставляют меня прибираться в комнате, и я должен сказать, что ненавижу делать это, так как я очень неаккуратный человек и мне сложно убирать всё на места.
- 7) Я знаю, что это может прозвучать странно, но я не против того, чтобы делать работу по дому. Я отвечаю за загрузку посудомоечной машины и выгуливание собаки, а ещё я должен мыть нашу машину каждое воскресенье.
- 8) Мои родители заставляют меня выбрасывать мусор каждое утро, на самом деле я и не возражаю, так как я делаю это по дороге в школу, но я должен сказать, что я ненавижу мыть полы.
- 9) Когда я был маленьким, меня заставляли мыть ванную комнату, включая унитаз, и, по правде говоря, я ненавижу делать это, так как не выносил запах всех этих средств для уборки.
- 10) Разделение работы по дому имеет свои недостатки. Например, мужчины не умеют делать работу по дому как следует. Женщины генетически запрограммированы на уход за детьми и лучше умеют наводить порядок, в то время как мужчины просто не способны уделять внимание таким вещам, как мытьё полов и вытирание пыли.
- 11) Есть преимущество в том, чтобы заставлять подростков делать домашнюю работу по дому. Во-первых, этот полезный навык сделает их более самостоятельными. Умение готовить, стирать и убирать поможет им в будущем, когда они будут жить отдельно от родителей.
- 12) Во-вторых, детский труд ничего не стоит, и родители могут сэкономить много денег, если их дети будут регулярно выполнять домашние дела. Например, уборщик берёт 3000 рублей за уборку трёхкомнатной квартиры, следовательно, если эту работу выполняют дети, то можно за месяц сэкономить 12 000.
- 13) Есть недостатки в том, чтобы заставлять подростков делать работу по дому. Например, это может привести к конфликтам в семье. Кроме того, это пустая трата времени, так как в современном мире все домашние дела выполняются с помощью бытовых приборов, таких как посудомойка, стиральная машина и мультиварка.

The analysis shows that not only do women do an average of 60 % more unpaid work in terms of hours, they also tend to do the work that has a higher value. One hour of hard labour with the vacuum cleaner, mop and scrubbing brush on domestic cleaning tasks is valued at £9, for example, while one hour's cooking is £7.50. It shows the value of all those chores and family responsibilities that people do themselves rather than pay somebody else to do.

Other research looking at changes in the value and division of unpaid care work in the UK showed the average amount of time that parents devote each day to childcare fell 5.7 %, from an average of one hour and 33 minutes per parent in 2000 to one hour and 27 minutes in 2015. In contrast, the average amount of childcare provided by over 60s and siblings increased over this same period.

Dust is a common air pollutant generated by many different sources and activities. Man-made dust is common in urban areas. It is created by a range of activities from personal hobbies, such as gardening, to large scale industrial activities, such as electricity generation at power stations. Dust particles vary in size from visible to invisible. The smaller the particle, the longer it stays in the air and the further it can travel.

Large dust particles fall out of the air relatively close to where they are created. These particles form the dust layers you can see on things like furniture and motor vehicles. Large dust particles tend to be trapped in the nose and mouth when you breathe them in and can be readily breathed out or swallowed harmlessly. Smaller or fine dust particles are invisible. Fine dust particles are more likely to penetrate deeply into the lungs while ultrafine particles can be absorbed directly into the blood stream.

A division of the Maytag Corporation, Hoover is probably best known for the line of vacuum cleaners it markets in the United States and Canada. However, the company also produces and sells high quality washers, dryers, dishwashers, and other products primarily in the United Kingdom and continental Europe. Maytag acquired The Hoover Company in 1989, providing Maytag an important foothold in the highly competitive international appliance market.

In 1908, Mr. Hoover and his son began selling vacuum cleaners from the family business after purchasing the rights to an electric suction sweeper invented the year before by Murrey Spangler, an inventor by profession who was moonlighting as a janitor at a local department store. From a soap box, fan, sateen pillow case, and broom handle, Spangler assembled a crude machine to vacuum the dust that aggravated his asthma when he swept carpets with a broom.
