the 1990s, the number of people who are employed in the service sector has increased in all countries. In the Netherlands, the number of people employed in the service sector has increased from 1.5 million in 1980 to 2.5 million in 1995. This increase is due to the fact that the service sector has become a more important part of the economy.

The increase in the number of people employed in the service sector has led to a change in the way that people work. In the past, people worked in large, hierarchical organizations. Today, people work in smaller, more flexible organizations. This change has led to a change in the way that people are managed. In the past, people were managed in a top-down manner. Today, people are managed in a more participatory manner.

The change in the way that people work and are managed has led to a change in the way that people think. In the past, people thought in a more linear manner. Today, people think in a more non-linear manner. This change has led to a change in the way that people solve problems. In the past, people solved problems in a more linear manner. Today, people solve problems in a more non-linear manner.

The change in the way that people think and solve problems has led to a change in the way that people learn. In the past, people learned in a more linear manner. Today, people learn in a more non-linear manner. This change has led to a change in the way that people are educated. In the past, people were educated in a more linear manner. Today, people are educated in a more non-linear manner.

The change in the way that people are educated has led to a change in the way that people work. In the past, people worked in a more linear manner. Today, people work in a more non-linear manner. This change has led to a change in the way that people are managed. In the past, people were managed in a more linear manner. Today, people are managed in a more non-linear manner.

The change in the way that people are managed has led to a change in the way that people think. In the past, people thought in a more linear manner. Today, people think in a more non-linear manner. This change has led to a change in the way that people solve problems. In the past, people solved problems in a more linear manner. Today, people solve problems in a more non-linear manner.

The change in the way that people solve problems has led to a change in the way that people learn. In the past, people learned in a more linear manner. Today, people learn in a more non-linear manner. This change has led to a change in the way that people are educated. In the past, people were educated in a more linear manner. Today, people are educated in a more non-linear manner.

The change in the way that people are educated has led to a change in the way that people work. In the past, people worked in a more linear manner. Today, people work in a more non-linear manner. This change has led to a change in the way that people are managed. In the past, people were managed in a more linear manner. Today, people are managed in a more non-linear manner.

The change in the way that people are managed has led to a change in the way that people think. In the past, people thought in a more linear manner. Today, people think in a more non-linear manner. This change has led to a change in the way that people solve problems. In the past, people solved problems in a more linear manner. Today, people solve problems in a more non-linear manner.
